of UK

These are postcodes where the bulk of the residents are not living in private households.

The category forms a single group, R: Not private households, which is sub-divided into three types:

60 Active communal population –
 Generally this is accommodation that may be unoccupied for part of the year, or where the people living in the accommodation regularly change. Other active communal accommodation might include hostels, children’s homes, refuges and local authority accommodation for travellers.

61 Inactive communal population –
 These people may be in communal establishments but unlikely to be active consumers. This includes care homes, hospitals, and other medical or nursing establishments where due to their health, the residents are unlikely to get out and about to function as regular consumers. It also includes prisons.

62 Business areas without resident population –
 These are postcodes where we believe there is no regular resident population. An example of this might be a business or industrial park.

Total Expenditure	£6,949,819	£599.95	£688.85	87			

Expenditure calculated for RF Centres includes weighted residential, worker and tourist spend; for RF catchments it includes weighted residential spend only. For all other catchments it includes residential, online and domestic tourist spend (all spend originating from these areas).

The figures are calculated from data from the Living Costs and Family (LCF) survey conducted by the Office for National Statistics. The analyses in this report are carried out by CACI and those who carried out the original collection and analysis of the data bear no responsibility for their further analysis or interpretation. The spend figures are based on current prices for the year stated at the top of the report. The Classification of Individual Consumption by Purpose (COICOP) is published by the UN Statistics Division to provide an international standard for the reporting of expenditure. Totals are controlled to national figures supplied by ONS Consumer Trends.
